

— Success Story —
**SOLUTION
SNAPSHOT**

BUSINESS OBJECTIVE

During their implementation of SAP Enterprise Learning (LSO), Cameron International encountered a variety of challenges regarding gaps in the delivered functionality of this solution. Key among these challenges was the lack of capability to address their requirement for tracking on-the-job training (OJT) as part of their Competency Assurance Program.

THE CHALLENGE

By implementing RegLearn, HCLabs's SAP-certified add-on for LSO, Cameron was able to quickly deliver a solution for their users to perform assessments of OJT and to track and report on this information as course and participation history within LSO, thereby minimizing risk from both a safety and financial perspective as well as lowering their long-term cost of managing regulatory compliance.

ADDED BENEFITS

Cameron International was also able to take advantage of the following enhancements for LSO offered by RegLearn:

- Learner Groups provide Cameron's training administrators with the flexibility to easily assign training en masse to the right target audience.
- The Revision Tool automates all steps required for course version management and notifies Cameron's employees when learning content has been updated.
- Cameron is able to effectively administer and report the overall compliance of employees with a series of certification-related training requirements.
- An enhanced Learner Portal gives Cameron's employees their entire training plan in one simplified view and easily identify their top training priorities.
- Cameron's employees are able to update training history with external training taken outside the company.
- Cameron's managers take advantage of the enhanced capabilities delivered within RegLearn Manager, including a training compliance dashboard with alerts and graphical views.
- RegLearn's Learning Paths guide Cameron's employees through a structured training plan with options for administrators to enforce the sequence of employee training as well as determining the timing and alternate minimum requirements for course completion.
- Additional Reports and Training Metrics make it much simpler for Cameron's training administrators to track training compliance.
