

SOLUTION SNAPSHOT

- Success Story -

Business Objective

Agfa HealthCare implemented the SAP Learning Solution in 2006, and while the LMS met many of their requirements, the company determined that it was still necessary to continue improving their ability to comply with regulatory requirements in the healthcare industry. In addition, automating process-related training and providing managers with a more effective method of tracking training requirements for their teams were also considered top priorities.

Solution Results

As a result of implementing RegLearn, hyperCision's SAP-certified add-on for the Learning Solution, Agfa HealthCare's training administrators are now able to assign and manage the training requirements of their workforce with much greater efficiency. RegLearn has enabled Agfa HealthCare to simplify their IT landscape and automate manual processes, thereby increasing user productivity and accuracy, and reducing their overall cost of training within a matter of weeks. Most importantly, many of the RegLearn enhancements designed to increase the SAP Learning Solution's usability, functionality and reporting capability have enabled Agfa HealthCare to ensure their absolute compliance with healthcare industry regulations.

“
RegLearn enabled us to streamline Agfa HealthCare's training processes and meet regulatory standards on both a global and local level with much less effort.
”

Academy Learning Platform Manager
Agfa-Gevaert HealthCare GmbH

Solution Benefits

Agfa HealthCare was also able to quickly take advantage of the following enhancements for LSO included with RegLearn:

- Learner Groups provide training administrators with the flexibility to easily assign training en masse to the right target audience.
- The Revision Tool automates all of the steps required for course version management and notifies employees when learning content has been updated.
- Training administrators are able to effectively administer and report upon the overall compliance of employees with a series of related training requirements.
- RegLearn enables Agfa HealthCare to easily administer and enforce retraining related to internal observations and other situations outside of the normal compliance cycle.
- An enhanced Learner Portal gives employees the ability to see their entire training plan in one simplified view and to easily identify their top training priorities.
- Managers are able to take advantage of the enhanced capabilities delivered within RegLearn Manager, including a training compliance dashboard with alerts notifying them when their employees require training.
- RegLearn's Learning Paths guide employees through a structured training plan with options for administrators to enforce the sequence of employee training as well as determining the timing and alternate/minimum requirements for course completion.
- Additional Reports and Training Metrics make it much simpler for training administrators to track training compliance.
